

PRODUCT INFORMATION

DAIWAX M

— Magnesium Stearate —

* Specifications

Appearance	White powder
Molecular Formula	$Mg(C_{18}H_{35}O_2)_2$
Moisture	Max. 4.0%
Metal Content	4.0-4.8%
Free Fatty Acid	Max. 2.0%
Melting Point	120-140 °C
Specific Gravity	0.25-0.35 g/ml
200 mesh pass	Min. 90.0%

* Uses

- Pigment dispersant
- Gelling agent
- Emulsifier
- Mold releasing agent and adhesion inhibitor for rubber and synthetic resin
- Lubricant for pharmaceutical tablet

* Characteristics

- Good lubricity for synthetic resin
- Improves adhesive property to skin and gives smooth feeling compounded into face powder, baby powder, aftershave powder, and so on.

* Packaging

10kg paper bag
