

PRODUCT INFORMATION

DAIWAX M₅₀

— Magnesium Stearate —

* Specifications

Appearance	White coarse powder
Molecular formula	Mg(C ₁₈ H ₃₅ O ₂) ₂
Moisture	Max. 4.0%
Metal Content	4.0~4.8%
Free Fatty Acid	Max. 2.0%
Melting Point	120-140°C
5 mesh pass	Min. 90.0%
145 mesh pass	Max. 15.0%

* Uses

- Pigment dispersant
- Gelling agent
- Emulsifier
- Delustering agent for paint
- Mold releasing agent and adhesion inhibitor for rubber and synthetic resin

* Characteristics

- Good lubricity as lubricant for synthetic resin
- Improves adhesive property to skin and gives smooth feeling compounded into face powder, baby powder, aftershave powder, and so on.

* Packaging

20kg paper bag
